

RESURFACED & RADIANT

Total Face Solutions

Euro Med Spa's belief system starts with the European Approach to **Prevention + Rejuvenation**. Slight enhancements prevent erosion and advance rejuvenation without notice of augmentation. At Euro Med Spa, our team of experts **focus on anti-aging solutions for skin damage caused by exposure to the elements of life.**

This is a comprehensive menu of non-invasive treatments to help you resurface the skin providing a radiant complexion.

Subnovii - Laser Light Therapy - Microneedling

Genetics, time & environment can leave our skin with uneven tone, texture issues, laxity, enlarged pores, acne and more.

SUBNOVII ®

Anti-Aging Technology That Delivers Results

AS AN ALTERNATIVE TO SURGERIES, the Subnovii plasma pen works by triggering activity in the skin's fibroblasts or tiny cells in the dermis that produce collagen. Fibroblasts play a crucial role in the skin tightening and firming that occurs during wound healing.

"This is unlike any other device on the market and fills a definite void..."

Ardis Schmitt, RN, BSN

Actual patient receiving treatment for scars, hyperpigmentation and eye area tightening.

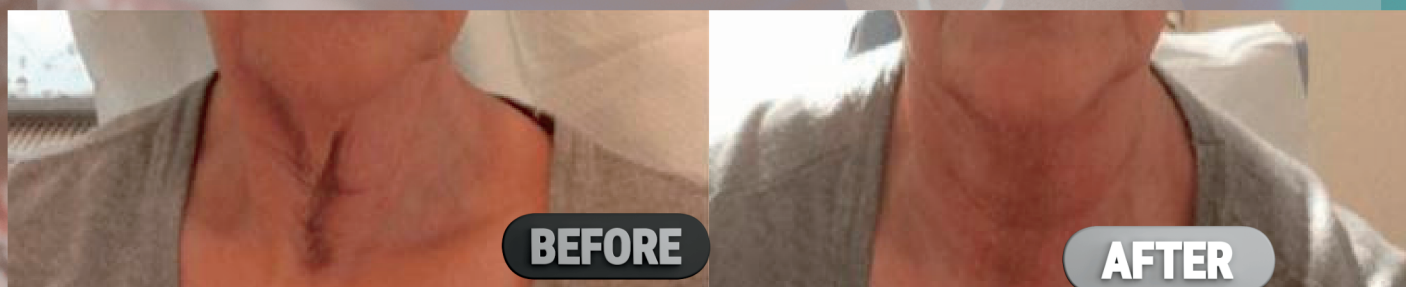

65+ Woman treated eye bags. Results are 1 month post op

PLASMA FIBROBLAST THERAPY CAN:

- Help to **regenerate** skin tissue
- **Stimulate** renewal of **collagen**, elastin, and hyaluronic acid
- **Tighten** and firm the skin
- Break down unwanted proteins in the skin
- Treat **crow's feet**, forehead lines, **smile lines**
- Correct **acne scarring** and stretch marks
- Effect a non-surgical blepharoplasty
- Create more **definition** in the **jawline** and neck

WHAT ARE THE BENEFITS OF SUBNOVII?

- **Reduces** wrinkles, **sagging skin**, and fine lines
- Improves skin texture and tone
- More youthful facial contours
- Preserves the outer skin layer
- No anesthesia or incisions
- Cost-effective
- Little downtime
- Long-lasting results, typically 2-3 years

65+ Woman treated neck. Results are 1 month post op

Subnovii offers **less post- treatment pain, risk of infection and downtime** compared to traditional ablative treatments and the results are extremely impressive.

65+ Woman treated eye bags. Results are 1 month post op

"Sometimes I just stare at my patients in amazement, it's like magic."

-Sara Emanuel, RN,

AREAS CAN BE TREATED INDIVIDUALLY OR ALTOGETHER

- Brow
- Upper eyelids
- Under-eye area
- Crow's feet
- Mouth area
- Jawline and jowls
- Neck
- Décolleté

45+ Woman treated lid and brow.

The Subnovii plasma pen will cause microtrauma to the skin, making tiny wounds that stimulate the body's collagen production. Thus, small scabs will form after treatment, which tends to disappear within about 5-10 days. You may experience some itchiness and tightness in the skin as well.

WHAT HAPPENS AFTER MY SUBNOVII PROCEDURE?

Results are immediate and continue to improve over 6 months as your body begins making new collagen. For about a month after your treatment, you'll need to **avoid prolonged exposure to the sun and wear an SPF of 30 or higher at all times.** This will help prevent hyperpigmentation.

IS It Worth IT?

According to REALSELF (*Advisors for Plastic Surgery & Cosmetic Procedures*) the answer is **100% YES!** Subnovii provides unmatched results.

Euro Med Spa

THE INVESTMENT

Subnovii Treatments

What you must know:

- ✓ Your skin will go through a healing phase
- ✓ This procedure does not require multiple sessions
- ✓ You can treat smaller areas individually, or all in one session
- ✓ You will notice change over the course of a few months.
- ✓ Take lots of pictures through out your healing process.

This technology is so new that very few people know about it. Sharing your story is so exciting when your results are incredible.

THE CUTERA TITAN®

Skin in a New Light

The Cutera Titan® uses light energy to heat the dermis deep beneath your skin's surface. Without surgery, recovery time, or injections, Titan is an ideal solution for your face, abdomen, arms and more.

Titan uses a safe infrared light to heat the dermis well below the skin's surface. During the procedure, the skin's surface (epidermis) is protected through continuous cooling with the Titan handpiece. Titan's light-based platform provides a uniform distribution of energy for heating the deep dermis.

Since the Titan procedure heats tissue under the skin's surface, patients of any skin type or age can be treated. Dr Iqbal will advise you if the Titan is right for you.

MD PEN MICRONEEDLING

Edit"MD PEN
MICRONEEDLING"
MD Pen Microneedling

Skin rejuvenation treatments with MDPen micro needling can be used to lift and tighten while diminishing wrinkles, photo aging, and pore size. Micro skin needling can also be effective in the treatment of stretch marks and acne scars.

How does MDPen improve the skin's appearance?

MDPen rapidly creates a pattern of micro channels in the treatment area. These micro channels significantly increase the production of collagen and elastin to leave the skin smoother, fresher, and more uniform. Micro channels also enhance the skin's ability to absorb medical grade topicals, like anti-aging serums and skin lighteners, when applied during or immediately after the treatment.
